## Caseload and Management of Patients

In general, there was an appropriately diverse mix of patients (including race and ethnicity) seen at this base hospital to meet the clinical training objectives.

The amount of patient care responsibilities assigned to me were just about right for my current level of training.

In general, I had an opportunity to develop procedural skills commensurate with my level of training.

I was given ample opportunity to become involved in learning about management of patient cases.

I felt supported and encouraged to offer my own differential diagnosis and treatment plan.

## Expectations/Learning Objectives

Standards for my expected level of performance (how I was to be evaluated) on this rotation were made clear to me at the outset.

On this rotation, the course protocol and its learning objectives were used by my preceptor to help me focus on content and/or skills that I was expected to master.

There were adequate didactics on this service to enhance my existing knowledge base; i.e. conferences were scheduled regularly and occurred as scheduled.

## Resources

There were sufficient educational resources (computers, books, journals, & other library materials) available to me on this rotation

I had access to educational resources at times that were convenient to me.

Osteopathic Principles and Practice

I had opportunities to use OMM on this service.

When seeking out opportunities to apply OMM, I felt supported by the faculty here.

Preclinical Preparation

The basic science content I learned in year 1 assisted me in learning from the experiences I encountered on this service

The systems biology content I learned in year 2 assisted me in learning from the experiences I encountered on this service

Supervision/Feedback

I received timely feedback about development of my clinical skills (e.g. charting, physical exams, history taking, and DPR, etc.)

On this service, there was always someone available to answer my questions when I had them.
I experienced little difficulty completing the procedures required for this rotation.

I was given adequate guidance by the staff when performing the assigned procedures.

I feel that the hospital orientation covered what I needed to know to be successful on this ER rotation.

Online modules on how to perform the required procedures were helpful to review to perform successfully on this rotation.

I was treated as a professional by those supervising my student-physician role on this service.

My supervising faculty on this service modeled physician-patient interactions on this service in ways I would like to emulate.

Issues of professionalism were included as a point of discussion by faculty on this rotation.

**Online Angel Course (MSUCOM)**

| I experienced technical problems accessing the web-based content. |
| N=12 | NA=2 | SD=6 | A=2 | SA=1 |
| 17% | 50% | 8% |

| The online modules for this course that is available in Angel helped me gain medical knowledge. |
| N=12 | NA=1 | SD=1 | A=4 | SA=5 |
| 8% | 8% | 42% | 8% |

**Overall Assessment**

This rotation offered a positive learning experience and stimulated my interest in this specialty of medicine.

| Taking everything into account, my experiences on this rotation stimulated my commitment to become an osteopathic physician. |

## Caseload and Management of Patients

### Section Comments
- Best rotation yet
- Students allowed to do lots of procedures, very hands on, loved it.

## Expectations/Learning Objectives

### Section Comments
- None
- Given procedures log expected to be completed on day 1, orientation pack very clear and well organized, expectations very clearly outlined.

## Resources

### Section Comments
- None

## Osteopathic Principles and Practice

### Section Comments
- None
- I did get to see OMM used as the definitive treatment for one of my patients which was an awesome experience!

## Supervision/Feedback

### Section Comments
- Staff all friendly, approachable, able to ask questions and was asked questions on this rotation.

## Procedures

### Section Comments
- Interns and residents get first choice at doing procedures even if you ask to do one. This made it difficult to get some of the procedures done, but not impossible if you are proactive in your learning.

## Overall Summary

Please complete the following sentence: ...The most beneficial experiences, classes, assignments, or activities in all my On Campus MSUCOM courses/experiences, which facilitated my performance on this clerkship rotation, were:

- Year 2 courses
- Systems classes
- the attendings and residents were very helpful and willing to teach
- My respiratory and Cardio courses helped me on this rotation.

## Please complete the following sentence: ...

This rotation could have been improved by offering an online module on the following:

- None
- Nothing
I felt the online modules were sufficient.

N/A

None - Online modules are not helpful. It is just one more thing to be required on top of the already burdensome requirements.

Please complete the following sentence: ...The thing(s) I liked most about this rotation was (were):

The hands on experience

procedures given to me as a student, friendliness of residents/attendings.

I really enjoyed all of the procedures that I got to do.

the variety and number of patients

i enjoyed the residents and attending physicians at Genesys. They took plenty of time to include me in each case, and gave me the opportunity to manage cases and do procedures. They took time to teach and answer my questions. I loved that OMM was used during this rotation, I didn't expect that. I feel more prepared to be an intern because of the cases I saw on this rotation and the education I gained, particularly in pharmacology. This was an excellent student rotation!

I had an opportunity to do a lot of hands on training.

The residents were very nice and helpful. Negatives - If you are going to require procedures and treasure hunts, it would be helpful to have more freedom of what patients you see. I feel like I only saw 4 things the entire month - not much variety.
