In general, there was an appropriately diverse mix of patients (including race and ethnicity) seen at this base hospital to meet the clinical training objectives.

The amount of patient care responsibilities assigned to me were just about right for my current level of training.

In general, I had an opportunity to develop procedural skills commensurate with my level of training.

I was given ample opportunity to become involved in learning about management of patient cases.

I felt supported and encouraged to offer my own differential diagnosis and treatment plan.

Standards for my expected level of performance (how I was to be evaluated) on this rotation were made clear to me at the outset.

On this rotation, the course protocol and its learning objectives were used by my preceptor to help me focus on content and/or skills that I was expected to master.

There were adequate didactics on this service to enhance my existing knowledge base; i.e. conferences were scheduled regularly and occurred as scheduled.

There were sufficient educational resources (computers, books, journals, & other library materials) available to me on this rotation.

I had access to educational resources at times that were convenient to me.
### Osteopathic Principles and Practice

### Preclinical Preparation

The basic science content I learned in year 1 assisted me in learning from the experiences I encountered on this service.

The systems biology content I learned in year 2 assisted me in learning from the experiences I encountered on this service.

### Supervision/Feedback

I received timely feedback about development of my clinical skills (e.g. charting, physical exams, history taking, and DPR, etc.).

On this service, there was always someone available to answer my questions when I had them.
I experienced little difficulty completing the procedures required for this rotation.  

I was given adequate guidance by the staff when performing the assigned procedures.  

I feel that the hospital orientation covered what I needed to know to be successful on this ER rotation.  

Online modules on how to perform the required procedures were helpful to review to perform successfully on this rotation.

I experienced technical problems accessing the web-based content.

The online modules for this course that is available in Angel helped me gain medical knowledge.

Overall Assessment

This rotation offered a positive learning experience and stimulated my interest in this specialty of medicine.

Taking everything into account, my experiences on this rotation stimulated my commitment to become an osteopathic physician.

Caseload and Management of Patients

Section Comments
My attendings were very helpful and allowed me to present cases, diagnosis, and pick the labs/test I think should be ordered.

Osteopathic Principles and Practice

Section Comments
OMM Emergencies?

Procedures

Section Comments
I had difficulty finding patients to complete the required 2 pap smears. There was only two patients that required them and one of them did not want a medical student in the room.

Overall Summary

Please complete the following sentence: ...The most beneficial experiences, classes, assignments, or activities in all my On Campus MSUCOM courses/experiences, which facilitated my performance on this clerkship rotation, were:

Respiratory

The respiratory course in my second year.

My respiratory course during my second year.

Cardiology and Respiratory

Cardio and Respiratory more than others.

Please complete the following sentence: ...This rotation could have been improved by offering an online module on the following:

maybe one on putting in a central line with US

I thought the online modules offered were helpful, I can't think of one that I felt was missing.

I cannot think of one that was missing.

Treatment of DKA, misc abdominal complaints

No, there is enough to do online. I gained much while in the ER.

Please complete the following sentence: ...The thing(s) I liked most about this rotation was (were):

the independence I was given and the chance to see a large volume of patients by myself.

The faculty listed at Munson that I worked with were outstanding. They let me see patients on my own and then had me come up with my own differential and order set. They also let me perform many procedures with supervision and guidance. I appreciated this very much and had a wonderful experience because of them.

The faculty that I worked with in the ER in Traverse City were outstanding. They let me see patients by myself and let me do many procedures which really enhanced my experience. They were always willing to talk to me and teach me about cases we had seen. They were wonderful and really solidified my decision to go into emergency medicine.
The freedom to do procedures and the ability to see a very diverse group of patients

The people: patients, docs, and staff. Reminded me why I chose medicine.
