In general, there was an appropriately diverse mix of patients (including race and ethnicity) seen on this service to meet the clinical training objectives.

The amount of patient care responsibilities assigned to me were just about right for my current level of training.

In general, I had an opportunity to develop procedural skills commensurate with my level of training.

I was given ample opportunity to become involved in learning about management of patient cases.

I felt supported and encouraged to offer my own differential diagnosis and treatment plan.

Standards for my expected level of performance (how I was to be evaluated) on this rotation were made clear to me at the outset.

The information presented on this rotation was presented at a pace and at a level that was consistent with my existing knowledge base.

There were sufficient educational resources (computers, books, journals, & other library materials) available to me on this rotation.

The online lecture series was helpful in understanding my patients.

The COM Clerkship Website provided convenient access to course documents and materials related to this rotation.
Preclinical Preparation

The basic science content I learned in Year 1 assisted me in learning from the experiences I encountered on this service.

The systems biology content I learned in Year 2 assisted me in learning from the experiences I encountered on this service.

In general, the material I learned in Years 1 & 2 had little clinical relevance to what I encountered on this service.

Supervision/Feedback

I received timely feedback about development of my clinical skills (e.g. charting, physical exams, history taking, and DPR, etc.).

On this service, I never quite knew where I stood in meeting expected outcomes.

On this service, there was always someone available to answer my questions when I had them.

The post-rotation examination reflected the core content areas as described in the course protocol.

This rotation offered a positive learning experience and stimulated my interest in this specialty of medicine.

Taking everything into account, my experiences on this rotation stimulated my commitment to become a physician.

Taking everything into account, my experiences on this rotation stimulated my commitment to become an osteopathic physician.

As a student I felt comfortable on this rotation.

Caseload and Management of Patients

Section Comments

My experience at Kingswood differed greatly from the one at Henry Ford Detroit. At Kingswood I was not given as much responsibility as at Henry Ford Detroit. At Detroit I was allowed to see my own patients and report to the attending physicians when we met up. It was up to us whether or not they should be re-evaluated by the attending. At Kingswood, I was told that I could see the patient if I liked.

Professionalism

Section Comments

Dr. Carol VanAndel was very empathetic to her patients and was a very good role model. Dr. Stromberg, however, was more cynical, sarcastic, and frequently made jokes about patients behind their backs. I thought this behavior was completely inappropriate and unprofessional.

Overall Assessment

Section Comments

Again, the Henry Ford Detroit experience was significantly more helpful to me than the experience at Kingswood because of the amount of responsibility that was given to me and the amount of patients that I encountered. More MSUCOM base hospitals should implement the teaching system of Henry Ford Detroit.

I felt very comfortable doing consults at HF Macomb. I was not nearly as comfortable at Kingswood because it is a lockdown unit with some very troubled patients who were not respected by their doctor.

Overall Summary - Please complete the following sentences

The most beneficial experiences, classes, assignments, or activities in all my on-campus MSU/COM courses/experiences, which facilitated my performance on this clerkship rotation, were:

- Behav., Doctor Patient relationship
- DPR

I feel I was very lucky to be placed at HF Kingswood. The staff was very friendly and encouraged learning. It was a great rotation for me and my learning.

Pschiatry

This rotation could have been improved by:

- An "osci" type experience where we get to practice interviewing a patient and writing up our note.

I rather have live lectures than online lectures. I would have also liked the MSUCOM faculty to actually be on-site for presentations and meetings instead of using poly-com.

- less time spent on the consult service

- this was a great rotation

The thing(s) I like most about this rotation was (were):

- All of the online lectures that supplemented the learning experience really well!

- My experience at HF Macomb was a great experience.

- my time spent at kingswood

- this was a great rotation
