In general, there was an appropriately diverse mix of patients (including race and ethnicity) seen at this base hospital to meet the clinical training objectives.

The amount of patient care responsibilities assigned to me were just about right for my current level of training.

In general, I had an opportunity to develop procedural skills commensurate with my level of training.

I was given ample opportunity to become involved in learning about management of patient cases.

I felt supported and encouraged to offer my own differential diagnosis and treatment plan.

### Expectations/Learning Objectives

Standards for my expected level of performance (how I was to be evaluated) on this rotation were made clear to me at the outset.

On this rotation, the course protocol and its learning objectives were used by my preceptor to help me focus on content and/or skills that I was expected to master.

There were adequate didactics on this service to enhance my existing knowledge base; i.e. conferences were scheduled regularly and occurred as scheduled.

Providing online student specific didactics, focused on key concepts and disorders, would help focus my studying.

### Resources

There were sufficient educational resources (computers, books, journals, & other library materials) available to me on this rotation.

I had access to educational resources at times that were convenient to me.
**Osteopathic Principles and Practice**

- I had opportunities to use OMM on this service.
- When seeking out opportunities to apply OMM, I felt supported by the faculty here.

</tbody>
</table>

**Preclinical Preparation**

- I could readily apply the basic science content I learned in year 1 to understand mechanisms of disease in my patients.
- I could readily apply the systems biology content I learned in year 2 to understand patient presentation and appropriate diagnostic testing.

**Supervision/Feedback**

- I received timely feedback about development of my clinical skills (e.g. charting, physical exams, history taking, and DPR, etc.)
- On this service, there was always someone available to answer my questions when I had them.
- I sought and received mid-rotation feedback to improve my performance.

### Professionalism

I was treated as a professional by those supervising my **student-physician** role on this service.

My supervising faculty on this service modeled **physician-patient** interactions on this service in ways I would like to emulate.

Issues of professionalism were included as a point of discussion by faculty on this rotation.

### Procedures

I experienced little difficulty completing the procedures required for this rotation.

I was given adequate guidance by the staff when performing the assigned procedures.

I feel that the hospital orientation covered what I needed to know to be successful on this ER rotation.

Online modules on how to perform the required procedures were helpful to review to perform successfully on this rotation.

This rotation offered a positive learning experience and stimulated my interest in this specialty of medicine.

Taking everything into account, my experiences on this rotation stimulated my commitment to become an osteopathic physician.
Overall Summary

Please complete the following sentence: …The most beneficial experiences, classes, assignments, or activities in all my On Campus MSUCOM courses/experiences, which facilitated my performance on this clerkship rotation, were:

Radiology, physiology, systems courses NMS, respiratory, cardiology and heme

Please complete the following sentence: …The thing(s) I liked most about this rotation was (were):

The opportunity to work any shift as well as the chance I had to work with every physician and PA on the ER staff. This was an excellent rotation with quite a bit of diversity in patients and pathology. My only complaint is that my internet access was quite restricted due to lack of sufficient computers available in the ER. The nurses were all fantastic as they were very helpful and worked great as a team. I do think that students however should have be given the opportunity to work with the EMR and orders for admission.
Overall Summary

Please complete the following sentence: …The most beneficial experiences, classes, assignments, or activities in all my On Campus MSUCOM courses/experiences, which facilitated my performance on this clerkship rotation, were:

cardio, respiratory and ACLS training.

Please complete the following sentence: …This rotation could have been improved by offering an online module on the following:

peripheral IV’s, arterial blood gas draws and foley catheter insertion. These are procedures that seem basic, but as a medical student are expected to know without any prior learning or practice until in the “field”. This makes it very stressful and intimidating to complete a basic procedure.

Please complete the following sentence: …The thing(s) I liked most about this rotation was (were):

the diverse group of patients that was seen.
