FCM 622

Core Family Med Sub-Internship
Clerkship Required Rotation (R2) Syllabus

Department of Family and Community Medicine
Amy Keenum, DO, PharmD
Chairperson

Rebecca Malouin, PhD, MPH, MS
Instructor of Record

Effective US17, FS17, SS18

For all questions regarding content or administrative aspects of this course, please first contact:

COURSE ASSISTANT
Stephanie Six, MSA
six@msu.edu

At MSUCOM, we are constantly working to improve our curriculum and to meet new AOA accreditation guidelines. We need to meet the challenges of modern medicine that force us to innovate. While major changes will generally be instituted at the beginning of the school year, most minor changes may be implemented semester to semester.

Please be mindful of the need to read your syllabi before beginning your rotations.

Introduction and Overview

Hello and welcome (again) to Family Medicine. This syllabus provides an overview of rotation goals and objectives designed to help you gain an understanding of the breadth and scope of family medicine. As you progress through the rotation, you will perform certain activities intended to help you meet the goals and objectives identified. Please make sure to review this syllabus in its entirety to ensure understanding of the rotation format and syllabus content.

Rotation Format:

This rotation has been designed to cover primary topics commonly seen in family medicine. Each week will focus on one didactic topic of importance and will be centered on a patient-oriented case. Each case will include between five and ten questions for you complete. Questions will have attached recommended readings that will help you to answer each question thoroughly. You may also choose to discuss these cases with preceptors you work with and you are encouraged to engage the attending physician in discussion as this will lend a greater understanding of these critical issues.

At the end of each week, you will have an online quiz to take based on the topic and your readings. Quizzes are completed via Desire2Learn (D2L), which is accessed at http://d2l.msu.edu and will require computer access. It is strongly encouraged that you take the quizzes at the end of each week as they can serve as a self-study element for your own education. All quizzes must be completed by the end of the rotation.

*DO/PhD student rotations generally span a period of approximately four months. As such, students on this curricular track should strive toward completing one module every three to four weeks.

Weekly Case Overviews:

Review each case and then use the associated study questions to identify critical learning points as well as prepare for the required corresponding quiz. Case questions are for self-study, but answers may be required if grading requirements are not met. See "Rotation Corrective Action Process" for further details.

Week 1 – Adult Immunizations

The case will focus on a typical adult individual coming for routine exam and in need of updates to his or her immunizations and will cover goals such as: identifying adult immunizations include initial and booster schedules; identifying contraindications to
these immunizations, recognizing what groups constitute ‘special populations’ in regards to immunizations and interpreting Hepatitis B serologies.

**Week 2 – Abnormal Liver Function Tests**

The case will focus on an individual with mildly elevated liver enzymes and will cover goals including: defining the term minimally elevated liver enzymes, developing a differential diagnosis, understanding the order of laboratory and diagnostic studies and developing treatment and follow up plans.

**Week 3 – Osteoporosis**

The case will focus on osteoporotic disease and cover elements including: defining the terms osteoporosis and osteopenia, identifying risk factors for development and screening recommendations, identifying screening methodologies and interpreting the results, using the FRAX calculator to calculate 10-year risk for osteoporosis and identifying and utilizing medication for the treatment of osteoporosis (including indications and contraindications).

**Week 4 – Upper & Lower Respiratory Infections**

The case will focus on infectious respiratory disorders. Goals include: identifying signs, symptoms and testing regimens for streptococcal pharyngitis, distinguishing between acute, subacute, recurrent and chronic rhinosinusitis, suggesting pharmacologic strategies for acute rhinosinusitis, defining and identifying otitis media in children (with suggestions for treatment) and defining and identifying community-acquired pneumonia (with suggestions for treatment).

**Goals and Objectives**

**Goals:**

- Gain an appreciation for the primary care approach to four commonly seen diseases.
- Understand how primary care physicians approach these diseases in the outpatient setting.

**Objectives:**

- Review guidelines for adult immunizations
- Identify three major disease processes seen in Family Medicine
- Recall risk factors for each disease process and relevant questions for screening
- Review appropriate stratification of each disease process, where applicable
• Recognize clinical manifestations of each disease
• Review relevant tests for each disease
• Identify resources for reviewing current guidelines for the management of these diseases from a primary care perspective
• Develop basic strategies for treatment of each disease including first-line recommendations and follow-up strategies
• Consider osteopathic manipulative techniques for specific manifestations of disease where applicable

**College Program Objectives**

In addition to the above course-specific goals and learning objectives, this clerkship rotation also facilitates student progress in attaining the College Program Objectives. Please refer to the complete list provided on the MSUCOM website.

**References**

Each recommended text or online reference should be reviewed at a reasonable pace. It should take you no longer than 30-45 minutes per night to review these elements. Online references will require an active internet connection to review as they will be accessed remotely via the MSU Health Science Library.

**Week 1 – Adult Immunizations**

Update on Immunizations in Adults - *Am Fam Physician*. 2011 Nov 1;84(9):1015-1020
(http://www.aafp.org/afp/2011/1101/p1015.html)

Recommended Adult Immunization Schedule 2014 (US) – CDC
(http://www.cdc.gov/vaccines/schedules/downloads/adult/adult-schedule.pdf)

Contraindications and precautions to commonly used vaccines in adults 2014 (US) – CDC
(http://www.cdc.gov/vaccines/schedules/downloads/adult/adult-schedule-contraindications-bw.pdf)

Vaccines that might be indicated for adults based on medical and other indications 2014 (US) – CDC
(http://www.cdc.gov/vaccines/schedules/downloads/adult/adult-schedule-bw.pdf)

General Recommendations on Immunization - Advisory Committee on Immunization Practices (ACIP)
(http://www.cdc.gov/mmwr/preview/mmwrhtml/rr6002a1.htm)

Recommended Immunization Schedule for Adults Aged 19 Years and Older (ACIP)
(http://www.cdc.gov/mmwr/preview/mmwrhtml/su6201a3.htm)
Hepatitis B: Diagnosis and Treatment - *Am Fam Physician*. 2010 Apr 15;81(8):965-972

Interpretation of Hepatitis B Serologic Test Results – CDC
(http://www.cdc.gov/hepatitis/hbv/pdfs/serologicchartv8.pdf)

**Week 2 – Elevated Liver Enzymes**

Causes and Evaluation of Mildly Elevated Liver Transaminase Levels - *Am Fam Physician*. 2011 Nov 1;84(9):1003-1008
(http://www.aafp.org/afp/2011/1101/p1003.html)

**Week 3 – Osteoporosis**

FRAX Calculator – (http://www.shef.ac.uk/FRAX/index.aspx)

**Week 4 – Upper and Lower Respiratory Infections**

Acute Rhinosinusitis in Adults - *Am Fam Physician*. 2011 May 1;83(9):1057-1063
(http://www.aafp.org/afp/2011/0501/p1057.html)

The Diagnosis and Management of Acute Otitis Media – *Pediatrics*, 2013 Feb 25;131(3):984-999
(http://pediatrics.aappublications.org/content/early/2013/02/20/peds.2012-3488.full.pdf+html)

The Diagnosis and Management of Community-Acquired Pneumonia in Adults – *Am Fam Physician*. 2011 Jun 1;83(11):1299-1306
(http://www.aafp.org/afp/2011/0601/p1299.html)

**Student Responsibilities and Expectations**

During the course of this rotation, the student is expected to take a proactive approach to learning about the discipline of family medicine. Students should make every effort to have an initial orientation session with the attending physician in an effort to review goals, objectives and expectations on both the part of the preceptor and student. During the orientation meeting, students should present the preceptor with a copy of the Attending Evaluation form as well as review this syllabus together. Doing so will improve
the overall rotational experience in terms of training and evaluation. Students should also suggest having a mid-month evaluation during the rotation to gain formative feedback and make adjustments as needed based on preceptor commentary. Doing so will encourage active participation and improve summative evaluations that occur at the end of the rotation.

During the four weeks of the rotation, the student is required to meet clinical and academic responsibilities:

- **The student will meet the following clinical responsibilities during this rotation:**
  - Report to their rotation in a timely fashion, dressed appropriately for each day of work. Be cognizant of any scheduling changes that occur and provide timely communication to the preceptor about excused or unexpected absences.
  - Demonstrate an enthusiastic and proactive attitude towards the learning process in general and family medicine specifically.
  - Treat all staff members, other rotators and patients with respect and demonstrate professional behavior in all interactions.
  - Do not engage in behaviors that are either: unprofessional/unethical, illegal or pose a risk to the patient or practice. If there is a question about something you are asked to do, speak with your precepting physician or (if the person you have concern about is the precepting physician) your Student Coordinator and/or Director of Medical Education for your base hospital.
  - Complete any and all requested responsibilities in a timely fashion and as directed by your precepting physician, excepting any inappropriate behaviors previously mentioned.
  - Represent oneself, fellow students and the College in a positive and professional manner.
  - Students are expected to function collaboratively on health care teams that include health professionals from other disciplines in the provision of quality, patient-centered care.

- **The student will meet the following academic responsibilities during this rotation:**
  - Complete all College curricular elements of the rotation as specified within this syllabus in a timely fashion.
  - Regularly access and review content provided within Desire2Learn (D2L) during the rotation to support and supplement your active learning process.
  - Students are expected to identify, access, interpret and apply medical evidence contained in the scientific literature related to patients health problems.
• Students are expected to: assess their personal learning needs specific to this clinical rotation, engage in deliberate, independent learning activities to address their gaps in knowledge, skills or attitudes; and solicit feedback and use it on a daily basis to continuously improve their clinical practice.

## Rotation Grading Requirements

In addition to completion of weekly quizzes and the evaluations, a passing score on the FM COMAT exam is required. Refer to “Family Medicine Exam Information” for more details.

Corrective Action Process for Deficient Academic Requirements

If a student does not successfully complete the academic requirements of the course, the student will be permitted to go through a “Corrective Action” process.

The steps of the "Corrective Action" process for FCM 622 (Core Family Medicine Sub-Internship) are as follows:

1. Failure to successfully complete required D2L components of the rotation:
   a. Students that do not successfully pass any, or all, of the individual weekly module requirements will be required to complete a specific corrective action which may take one of a variety formats. The type of corrective action assignment will be determined by the Instructor of Record. Examples include, but are not limited to, a paper on professionalism, review of study questions, submitting self-study elements for grading, etc. It is the student's responsibility to contact the course assistant to determine the method of corrective action that will be taken.

2. Failure to pass the COMAT exam:
   a. The student will be given up to two additional attempts to pass the exam. These attempts must be scheduled by the student via the normal scheduling process. The student must notify the Course Assistant of their scheduled dates of the exam, when confirmed.

3. Failure of the rotation for other reasons (poor performance in the eyes of the specialist and/or Director of Medical Education):
   a. The student will be subject to an alternate remediation plan designed by the Director of Medical Education in conjunction with the Dean of Student Services and Clinical Curriculum Director.

If a student completes the corrective action successfully, as determined by the Instructor of Record, the student will receive credit for the deficient academic grading requirement(s).
If a student does not complete the corrective action successfully, as determined by the Instructor of Record, the student will receive an “N” grade for the course.

**Core Competencies/Learning Modules**

The Core Competencies were developed by the AOA to represent seven defined areas. In 2007, the American Association of Colleges of Osteopathic Medicine developed a document to assist colleges in integrating these same core competencies into medical education at the medical student level. The following core competencies are addressed during the month of Family Medicine:

1) **Osteopathic Principles and Practice**
   a. Approach the patient with recognition of the entire clinical context, including mind-body and psychosocial interrelationships
   b. Diagnose clinical conditions and plan patient care
   c. Perform or recommend OMT as part of a treatment plan
   d. Communicate and document treatment details

2) **Medical Knowledge**
   a. Articulate basic biomedical science and epidemiological and clinical science principles related to patient presentation

3) **Patient Care**
   a. Gather accurate data related to the patient encounter
   b. Develop a differential diagnosis appropriate to the context of the patient setting and findings
   c. Form a patient-centered, inter-professional, evidence-based management plan
   d. Provide health promotion and disease prevention (HPDP)
   e. Engage in documentation, case presentation, and team communication

4) **Interpersonal and Communication Skills**
   a. Establish and maintain the physician-patient relationship
   b. Demonstrate effective written and electronic communication in dealing with patients and other health care professionals
   c. Work effectively with other health professionals as a member or leader of a health care team
5) Professionalism
   a. Demonstrate humanistic behavior, including respect, compassion, probity, honesty, and trustworthiness
   b. Demonstrate accountability to patients, society, and the profession, including the duty to act in response to the knowledge of professional behavior of others
   c. Attain milestones that indicate a commitment to excellence, as, for example, through ongoing professional development as evidence of a commitment to continuous learning

6) Practice-Based Learning and Improvement
   a. Describe the clinical significance of and apply strategies for integrating research evidence into clinical practice
   b. Critically evaluate medical information and its sources, and apply such information appropriately to decisions relating to patient care

7) Systems-Based Practice
   a. Demonstrate understanding of how patient care and professional practices affect other health care professionals, health care organizations, and society
   b. Identify and utilize effective strategies for assessing patients

Special Considerations

Family medicine is one of the most varied of fields where you can see a wide spectrum of physicians practice an even wider range of medical elements in sub-specialties. It is important to remember that family medicine represents the frontline of medical care, not only in terms of interaction with the community and society, but also in terms of good stewardship of medical resources, both financial and material. During your time on this rotation, consider discussing with your attending physician(s) aspects of medical care such as: health care reform and its impact, being a financially responsible physician and the delivery of care in a resource-deprived environment, etc. You will find that most family physicians are not only interested, but passionate about these topics. As an aspiring member of the profession, you should utilize this time to better understand the environment you will be part of in the future.
COMAT Exam Information

All students are required to take the NBOME COMAT examination in Family Medicine on the last Friday of this rotation. If this deadline is not met and the student fails to sit for the scheduled exam with notification and approval of the department is grounds for failure of the exam. Students will need to contact the Course Assistant, Stephanie Six, 1) by the end of the first week of the rotation if there is a conflict regarding taking the exam on the last Friday of the rotation, or 2) within 24 hours of an emergency that will keep the student from taking the exam the last Friday of the rotation. Course faculty will consider each case and determine if a delay in the exam will be permitted. Should a student be granted a delay in examination, the Department will send written approval and notification of the required reschedule date to the COM Office of the Registrar.

If a student requires an accommodation, a valid VISA from the Resource Center for Persons with Disabilities must be presented to the COM Office of the Registrar 7 days in advance of the COMAT examination date. The student must also disclose which allowed accommodations s/he intends to use for the exam 7 days in advance of the COMAT examination date.

For additional information on exam registration and administration, please visit the COM Office of the Registrar’s COMAT webpage: http://com.msu.edu/Students/Clerkship/COMAT_Subject_Exams.htm.

Students must score 77 or greater in order to pass the exam. Each student will be allowed to take the exam 2 times before receiving an “N” grade for the rotation. When a student must sit for a re-take of the exam, s/he will be contacted by the Course Assistant, who will provide the student with a deadline by which s/he must sit for the re-take, as well as the consequence for failure to do so. If a student receives an “N” grade for the rotation, s/he will be notified of the failure by the department.

Unsatisfactory Clinical Performance

A student’s clinical performance will be assessed through the Attending Clinical Clerkship Rotation Evaluation. Unsatisfactory Attending Evaluations are governed by the Policy for Retention, Promotion and Graduation (4.e).

An overall “Below Expectations” rating on Section 1 of the Clinical Clerkship Rotation Evaluation will be referred to the Instructor of Record/Department Chairperson for review and grade determination. Students who receive two or more Clinical Clerkship Rotation Evaluations with an overall “Below Expectations” rating will be referred to the COSE Clerkship Performance Subcommittee for review.
An overall “Below Expectations” rating on Section 2 of the Clinical Clerkship Rotation Evaluation will be referred to the Associate Dean/Student Services. In consultation with the Instructor of Record/Department Chairperson a determination of action will be reached.

Important Note: The student will maintain an Extended (ET) grade until all academic and clinical requirements have been successfully met.
Base Hospital Requirements

(To be defined and evaluated by individual hospitals)
MSU College of Osteopathic Medicine Standard Policies

The following are the standard MSUCOM policies students must adhere to across rotations.

Attendance Policy

Clerkship activities are mandatory and timely attendance is expected at all educational events.

In the event a student must be absent from clerkship activities, he/she must, firstly, have prior approval from the Graduate Medical Education office (DME/DIO, Clerkship Director, and/or Student Clerkship Coordinator per the rotation sites process/policy). The clinical preceptor must also approve the absence, and determine an acceptable make-up plan which may include, but is not limited to: additional time on rotation, additional presentation(s), or written assignment(s). In the event of an emergency, the student must contact the Graduate Medical Education office and clinical preceptor as soon as the situation allows. Any exception to this attendance policy for any given rotation will be noted in the course syllabus.

Abuse of this policy, as determined by the GME office or a clinical preceptor, may be documented in a student evaluation(s) and/or reported to the Associate Dean of Student Services at MSUCOM via the Student Incident Report Form: http://com.msu.edu/Students/Registrar/Policies.htm or via phone call to the Associate Dean of Student Services (517-353-8799).

ROTATION SPECIFIC EXCEPTIONS TO THE ABOVE ATTENDANCE POLICY: NONE

Policy for Medical Student Supervision

Supervisors of the Medical Students in the Clinical Setting

The MSUCOM curriculum includes required clinical experiences in a variety of clinical learning environments. The role of the student is to participate in patient care in ways that are appropriate for the student’s level of training and experience and to the clinical situation. The student’s clinical activities will be under the supervision of licensed physicians. This supervising physician may delegate the supervision of the medical student to a resident, fellow, or other qualified healthcare provider, however, the supervising physician retains full responsibility for the supervision of the medical
students assigned to the clinical rotation and must ensure his/her designee(s) are prepared for their roles for supervision of medical students.

The physician supervisor and his/her designee(s) must be members in good standing in their facilities and must have a license appropriate to his/her specialty of practice and be supervising the medical student within that scope of practice as delineated by the credentialing body of the facility.

**Level of Supervision/Responsibilities**

Clinical supervision is designed to foster progressive responsibility as a student progresses through the curriculum, with the supervising physicians providing the medical student the opportunity to demonstrate progressive involvement in patient care. MSUCOM students will be expected to follow clinical policies of the facility regarding medical records and clinical care. Medical student participation in patient history/physical exam, critical data analysis, management, and procedures will include factors, but not limited to:

- The students demonstrated ability
- The students level of education and experience
- The learning objectives of the clinical experience

First and second year medical students will be directly supervised at all times (supervising physician or designee present or immediately available.

Third and fourth year medical students will be supervised at a level appropriate to the clinical situation and student’s level of experience. For some tasks, indirect supervision may be appropriate for some students. Direct supervision would be appropriate for advanced procedures.

Supervising physicians will provide medical students with timely and specific feedback on performance. The supervising physician will complete a mid-rotation evaluative discussion with the medical student. Supervising physicians will complete a summative evaluation and are encouraged to contact the course/clerkship director with any gaps in student performance.

Medical students with any concern regarding clinical, administrative, and educational or safety issues during his/her rotation will be encouraged to contact the supervising physician or clerkship/course director.
Statement of Professionalism

Principles of professionalism are not rules that specify behaviors, but guidelines that provide direction in identifying appropriate conduct. These principles include the safety and welfare of patients, competence in knowledge and skills, responsibility for consequences of actions, professional communication, confidentiality, and lifelong learning for maintenance of professional skills and judgments. Professionalism and professional ethics are terms that signify certain scholastic, interpersonal and behavioral expectations. Among the characteristics included in this context are the knowledge, competence, demeanor, attitude, appearance, mannerisms, integrity and morals displayed by the student to faculty, peers, patients and colleagues in other health care professions. Students are expected to conduct themselves at all times in a professional manner and to exhibit characteristics of a professional student.

Student Rights and Responsibilities

Each individual student is responsible for their behavior and is expected to maintain standards of academic honesty. Students share the responsibility with faculty for creating an environment that supports academic honesty and principles of professionalism. Proper relationship between faculty and student are fundamental to the college’s function and this should be built on mutual respect and understanding together with shared dedication to the education process. It is a fundamental belief that each student is worthy of trust and that each student has the right to live in an academic environment that is free of injustice caused by dishonesty. While students have an obligation to assist their fellow students in meeting the common goals of their education, students have an equal obligation to maintain the highest standards of personal integrity.

Faculty Responsibilities

It is the responsibility of the college faculty to specify the limits of authorized aid (including but not limited to exams, study aids, internet resources and materials from senior students) in their syllabi, and it is the responsibility of students to honor and adhere to those limits. Course instructors shall inform students at the beginning of the semester of any special criteria of academic honesty pertinent to the class or course.

It is the responsibility of the clinical faculty to provide students with ongoing feedback during rotation upon request. Clinical faculty are generally recommended (though not required) to limit student assigned duty hours from 40 to 60 hours weekly (and not exceeding 60 hours). Both faculty and students are to be treated fairly and professionally in order to maintain a proper working relationship between trainer and trainee.
Course Grades

- **P-Pass** – means that credit is granted and that the student achieved a level of performance judged to be satisfactory according to didactic and clinical performance by the department.

- **N-No Grade** – means that no credit is granted and that the student did not achieve a level of performance judged to be satisfactory according to didactic and clinical performance by the department. Students who receive an N grade will be required to appear before the Committee on Student Evaluations Clerkship Sub Committee (COSE).

- **ET-Extended Grade** – means that a final grade (“Pass” or “No Grade”) cannot be determined due to one or more missing course requirements. In Years 3 and 4, the ET grade is used instead of an “Incomplete (I)” grade. Once all course requirements have been completed, received, and processed, the ET grade will be changed to a final grade. An “ET” will NOT remain on a student’s transcript.

**N-Grade Policy**

Remediation is not offered for Clerkship courses. Any student who receives an N grade in the Clerkship Program will be required to appear before the COSE Clerkship Performance Subcommittee (COSE).
Rotation Evaluations

**Attending/Faculty/Resident Evaluation of Student**

Students are responsible for assuring that his/her clinical supervisor receives the appropriate evaluation form. Forms can be accessed via the “Attending Evaluation” link in the student’s Kobiljak online Clerkship schedule.

Students should assertively seek feedback on his/her performance throughout the course of the clinical rotation. Students should also sit down and discuss the formal evaluation with the clinical supervisor. Note that the clinical supervisor and the DME from the rotation hospital are required to sign the form.

Students should keep a copy of the evaluation and leave the original with the Medical Education Office at the clinical training site where that office will review, sign, and forward the completed form to the COM Office of the Registrar. It is important to know that evaluations will not be accepted by the COM Office of the Registrar if submitted by the student. Any evidence of tampering or modification while in the possession of the student will be considered “unprofessional behavior” resulting in an “N” grade and review by the Committee on Student Evaluation (COSE) and/or the College Hearing Committee.

Grades are held until all rotation requirements, including evaluation forms, are received. Be sure you are using the correct form.

**Student Evaluation of Rotation**

Students will submit their rotation evaluations electronically at the conclusion of every rotation by accessing their online schedule through Kobiljak.

---

**Exposure Incidents Protocol**

A form has been developed by the University to report exposure incidents. The form can be accessed at [http://www.com.msu.edu/AP/clerkship_program/clerkship_documents/exposure.pdf](http://www.com.msu.edu/AP/clerkship_program/clerkship_documents/exposure.pdf).

Please make yourself familiar with the procedure and the form.
Student Experience Log
FCM 622 Family Medicine Sub-I

Attending mid-rotation feedback date: 

Attending Signature: (Verifying mid-rotation feedback and logs)

Students are required to complete the student experience logs, and submit them via D2L dropbox by 11pm on the last day of the rotation.

On this rotation you are required to encounter the below clinical presentations, if your rotation should not permit the following, you are required to gain the knowledge via modules/readings per syllabus. Place a checkmark where appropriate.

<table>

OMM- briefly describe how you used OMM on one patient during this rotation: 

Rotation Dates: ______________________
Rotation Site: ______________________
Rotation Attending: ______________________

Comments: 

I participated in interprofessional collaboration (collaboration on patient care with healthcare workers of different professional backgrounds) on this rotation:  

☐ Yes  
☐ No

Describe one encounter on this rotation when you collaborated on patient care with a healthcare worker of different professional background. Please identify the profession of the healthcare worker and how you perceived the experience (positive/neutral/negative).

Wellness: An active process of becoming aware of and making choices toward a healthy and fulfilling life.

Have you set one personal wellness goal you would like to accomplish during this rotation?  

☐ Yes  
☐ No

Did you accomplish this goal by the end of the rotation?  

☐ Not at all  
☐ Somewhat  
☐ Completely accomplished goal or exceeded
