   Fee Follies set for May 4

COMMUNIQUE Communique, a newsletter publication of the Michigan State University College of Osteopathic Medicine, is issued 18 times a year through the Health and Medicine Section of the MSU Department of Information Services, A314 E. Fee Hall, East Lansing, MI 48824; telephone 517/353-0820. Members of the Editorial Advisory Committee include Allen W. Jacobs, Ph.D. (Chairman); Francis A. Bernier, Ph.D., Gordon C. Spink, Ph.D., D.O.; Nancy M. Houston, B.A. (Editor), Patricia Grauer, M.A. (Associate Editor). Production and circulation manager is Carol Howland. Date of next issue will be March 19, 1979. Copy deadline for next issue: March 7, 1979.
$1-MILLION MASS SPECTROMETRY FACILITY OCCUPIES NEW QUARTERS AT MICHIGAN STATE

One of the nation's most versatile centers for analyzing complex chemicals is now open for regional and national business in the Biochemistry Building at Michigan State University.

MSU's consolidated and expanded Mass Spectrometry Facility celebrated its growing reputation and brand-new quarters in December with a colloquium and open house.

On hand for the event were leading authorities on chemical analysis plus scientists from around the country who have made use of MSU's equipment and expertise or plan to do so in the future.

The million-dollar facility, located on campus in the Biochemistry Building, is one of seven mass spectrometry laboratories designated as "biotechnology resources" by the National Institutes of Health (NIH).

It is supported by the NIH's Division of Research Resources and, as such, it serves all researchers funded by NIH. The idea is to save tax dollars by avoiding duplication of very sophisticated, expensive research resources.

Although the facility is considered a regional one, it has certain special capabilities which are utilized by researchers from other regions, says Charles C. Sweeley, professor of biochemistry. He and John F. Holland, associate professor of biochemistry, are coordinators of the facility.

The MSU facility was established in 1968 by the NIH as part of Dr. Sweeley's laboratory. Recent growth in equipment and use necessitated the move to the new location.

The Mass Spectrometry Facility is distinguished not only by the quality of its equipment but also by quantity and versatility, says Dr. Sweeley.

There are six mass spectrometers and each is hooked to a computer which is programmed to read the peaks and valleys on any given printout and to compare them with similar data on known substances.

For example, in respect to urine analysis, Sweeley and his colleagues have worked out a routine which results in a printout listing some 150 components of urine and the amounts of each compound found in any given sample. The printout also indicates whether any single component is present in greater or lesser amounts than normal.

Sweeley's aim is to make it possible to routinely make such analyses of urine as a way of predicting the onset of some diseases, especially certain genetic diseases, even before overt illness has been observed.

Only two of the six mass spectrometers in the MSU facility are alike. These two and the others are capable of general mass spectrometry work and also certain specialized functions.

Use of the facility by scientists from other institutions have been numerous and broad. One regular user has been the U. S. Arm Laboratories at Natick, Mass., where preservation of food by radiation is being extensively studied.

(Continued)
MASS SPECTROMETRY FACILITY (Continuation)

Other off-campus users include researchers from the University of California at Berkeley (which also has a biotechnology resources mass spectrometry facility), Mt. Sinai Medical School in New York, Washington University, University of Texas, University of Minnesota, University of Guelph in Ontario, Vanderbilt University, University of Houston, Johns Hopkins University, and the University of Oklahoma.

The facility also trains young scientists in the use of mass spectrometry. Recipients of such training during the past year include new Ph.D.s from Tel Aviv University in Israel, Florida Atlantic University and MSU.

***

BACK PAIN FEATURED TOPIC
AT FIRST "PAIN SEMINAR"

A new series of annual seminars on pain will begin Sunday, March 18, at Michigan State University with a discussion of back pain.

Sponsored by the College of Osteopathic Medicine and the Continuing Education Service, the seminar will be held at the Kellogg Center for Continuing Education. Registration will be at 8 a.m.

Morning programs will include the physiologic, mechanical and emotional mechanisms of pain. Also featured will be presentations on the organization of a pain clinic, the physiology of pain, the behavioral and emotional response to chronic pain, the biomechanics of the back and objective findings with pain.

Afternoon topics will concentrate on procedures used in back pain management. Means for control discussed will include surgery, nerve blocks, acupuncture, transcutaneous transmitters, biofeedback, hypnosis, osteopathic manipulation and physical therapy.

Conference faculty from MSU include Thomas Adams, Ph.D., professor of physiology; Ear Gonyaw, D.O., professor of neurosurgery in the Department of Osteopathic Medicine; Andrew MacKenzie, D.O., associate professor of radiology; William McGill, D.O., assistant clinical professor of biomechanics; John Upledger, D.O., associate professor of biomechanics; and Carl Vann, Ph.D., adjunct professor of community health science.

From the Southfield Rehabilitation Center are faculty Kevin Brown, D.O., resident in physical medicine and rehabilitation; Claude Oster, D.O., medical director; and James Traylor, R.P.T., supervisor of pain clinic.

Other faculty include Jude Cotter, Ph.D., C.S.W., professor of social services, Oakland Community College; G. Hadjian, M.D., head of Pain Control Center of East Lansing and chief of anesthesiology, Provincial Hospital; Richard Lee, Ph.D., adjunct professor of psychology, Wayne State University; Armando Ortiz, M.D., chief of neurosurgery, Providence Hospital.

Application has been made for seven hours of Category I continuing medical education credit from the American Osteopathic Association and the Michigan Board of Osteopathic Medicine and Surgery.

For information or registration material, contact Sandy Kilbourn, coordinator for continuing medical education, A333 E. Fee, 353-9922, or Joan Martin Alam, Kellogg Center for Continuing Education, 353-7822.

- 4 -
MSU PEDIATRICS CONFERENCE

Genetics and hereditary disorders in children will be the focus of the second annual Pediatrics Conference at Michigan State University's Kellogg Center for Continuing Education March 17-18.

The College of Osteopathic Medicine's Department of Pediatrics is sponsoring the two-day event, with registration at noon Saturday.

The Saturday afternoon program will feature discussion of patterns of inheritance, chromosomal errors and multifactorial inheritance. James V. Higgins, Ph.D., professor of human development, and Lloyd Schneiderman, D. O., professor of pediatrics, will lead.

The Sunday morning topics include the biochemical analysis of enzymatic pathways by Clarence H. Suelter, Ph.D., professor of biochemistry, and inborn errors of metabolism and prenatal diagnosis of genetic disorders by Robert Desnick, M.D., Ph.D., chief of the Division of Medical Genetics, Mount Sinai School of Medicine.

Featured on Sunday afternoon are ethical issues in genetics by Martin Benjamin, Ph.D., assistant coordinator of the Medical Humanities Program and associate professor of philosophy; immunogenetics, by Emanuel Hackel, Ph.D., professor of medicine and zoology; and genetic counseling, by Mary L. Brady, M. S. S., associate professor of community health science and human development.

Eleven hours of Category I continuing medical education credit have been requested from the American Osteopathic Association and the Michigan Board of Osteopathic Medicine and Surgery.

For information or registration materials, contact Sandy Kilbourn, coordinator for continuing medical education, A333 E. Fee Hall, 353-8822, or Joan Martin Alam, conference coordinator, Kellogg Center for Continuing Education, 332-6571.

JORDAN RETURNS FROM FIELDWORK IN MEXICO ON BIRTH PRACTICES

Brigitte Jordan, Ph.D., has recently returned from another period of fieldwork in Yucatan, Mexico, where she is doing research on traditional obstetric care delivery systems.

During that time, Jordan, an assistant professor of anthropology and of community health science, was invited by the Secretaria de Salud y Asistencia (Ministry of Health) and the Instituto Nacional Indigenista (Bureau of Indian Affairs) to participate in a training program for indigenous midwives. She also advised local public health officials on appropriate training methodology.

***
INTERNATIONAL REHABILITATION EXPERT
TO BE FEATURED AT DEAN'S SEMINAR MARCH 13

An internationally recognized expert in medical rehabilitation will be featured speaker at the Dean's Seminar Tuesday, March 13.

Kurt Jochheim, M.D., director of the Rehabilitation Institute, University of Cologne Medical Center, Cologne, West Germany, will discuss Experiences in Medical Education — Physical Medicine and Rehabilitation."

The seminar is scheduled from 1:30 to 3 p.m. in A316 E. Fee.

Jochheim is a clinical practitioner, teacher, and researcher in medical rehabilitation, and was recently president of the Rehabilitation International.

Persons interested in attending should contact Sharon Roehon, 355-9611.

***

LETTER FROM THAILAND

Joyce Johnson, a second-year student at MSU-COM, recently wrote of her experiences in studying the organization of health care in Thailand. Johnson is visiting the East as the only osteopathic medical student to win a Medical Perspectives Fellowship through the National Fund for Medical Education.

Johnson writes "...I'm visiting a variety of district programs...(which) include a family planning program with mobile clinics, malaria control project, TB hospital, leprosarium and rehabilitation hospital...

"The cities have most services that a secondary care facility in the U. S. would offer. The rural population is limited to 'injection doctors' whose primary tools are the antibiotics, and local medicine men who are the tribes' religious leaders. Most of the hilltribes view illness as being caused by unhappy spirits, so to get well, one must appease the spirits."

The Medical Perspectives Fellowships are funded through SmithKline Foundation.

MSU-COM's FIRST YEAR BOOK GOES TO PRESS

The first edition of MSU-COM's yearbook, Curans Manus, has gone to press.

The nine by twelve-inch 200-page publication includes sections on faculty, alumni, the graduating class of 1979, and the classes of 1980 and 1981. In addition, there is a historical section on the origins of the College, and a color section of some MSU campus scenes.

Yearbooks may still be ordered at $15 each, with checks made payable to Curans Manus. Please include name, address and department (if on campus) with the number of books desired. Yearbooks will be available June 8, 1979. Orders or requests for information should be directed to Inez Slaubaugh, 27321 Dequindre, Apt. 9, Madison Heights, Michigan 48071.

***
SPRING TERM REGISTRATION SCHEDULE

Year I and II On-campus Students

Early registration will be held from March 12 to 16 for first and second year students. Regular registration is March 26 and 27. Students should pick up enrollment cards in the Office of Student Affairs, A339 E. Fee, and proceed to the Men's Intramural Building to pay fees.

Unit III Students

On Friday, March 9, only, Unit III students in the Detroit-Pontiac area may register between 9 a.m. and 4 p.m. at the Michigan Center for Continuing Education in Osteopathic Medicine, 900 Auburn Rd., Pontiac. Students must be prepared to make full payment of tuition and fees by check at this time. Validated fee receipts will be forwarded to the students after registration.

Unit III students unable to complete registration in Pontiac will need to come to campus to register in person, preferably during the early registration period March 12-16. Registration materials for these students may be obtained in the Office of Student Affairs and payment of fees made at the Men's IM Building.

The Men's IM Building will be open from 8 to 11:30 a.m. and from 1 to 4:30 p.m. on the specified days.

Tuition and fees for full time osteopathic medical students for spring term will be $788 for in-state residents, and $1,563 for out-of-state students.

***

SIGMA SIGMA PHI TO SPONSOR MAJOR PROGRAM ON NUTRITION

A two-day symposium for physicians on human nutrition is being planned by students in Sigma Sigma Phi osteopathic fraternity at the MSU College of Osteopathic Medicine.

To be held Saturday, March 31, and Sunday, April 1, the program will include nutritional needs ranging from newborns to elderly, nutritional considerations in various disease states, and factors such as ethnic, prenatal, and athletic diets.

The program will be held at the Michigan Center for Continuing Education in Osteopathic Medicine, 900 Auburn Rd., Pontiac.

***

GRAND ROUNDS SCHEDULED MARCH 5

"The Application of Manipulative Therapy in Cardiovascular Disease" will be the topic at the College of Osteopathic Medicine grand rounds Monday, March 5.

Gary Campbell, D.O., associate professor of family medicine, will lead the presentation at noon in E101 Fee Hall.

***
MILLER, SHAPIRO VISIT REPUBLIC OF CHINA

Milton K. Miller, D.O., clinical professor of surgery, was the tour leader of a group that visited the Republic of China for three weeks in September. Eli Shapiro, MSU-COM student, was a member of the party, which included six osteopathic physicians, four allopathic physicians, two CPA's, a retired minister, schoolteachers, housewives, a psychologist, and businessmen.

In addition to visits to communes, schools, factories, cultural events and other attractions, the group also studied the operations of hospitals, commune health stations, neighborhood clinics and a sanitarium.

One of the highlights of the hospital tours was the Ji Shuai Tang Hospital in Peking, which specialized in traumatology. Here members of the group examined patients who had undergone successful reconstruction of hand digits with toes through microsurgical procedures.

At the provincial hospital in Canton, the group observed cardiac valvular surgeries under general anesthesia and a thyroidectomy under acupuncture anesthesia.

***

FOR YOUR CALENDARS: ALUMNI LUNCHEON MAY 18

The annual MSU-COM alumni luncheon, held in conjunction with the Michigan Association of Osteopathic Physicians and Surgeons scientific seminar, will be held from noon to 2 p.m., Friday, May 18.

Both alumni and friends of the MSU College of Osteopathic Medicine are invited to attend the luncheon at the Hyatt Regency Hotel in Dearborn.

Alumni luncheon expenses are included in the registration fee for the May 17-19 convention. Registration materials will be sent by MAOP&S in early March.

***

COMPOSITE PHOTO: CLASS OF 1979

Students graduating during calendar 1979 are eligible for inclusion in a composite photo made from pictures taken previously by Packer Studios for the yearbook, Curans Manus.

Individual orders of the composite are available at $12.48 each, and must be received before March 31, 1979. Checks payable to "Packer Studios" should be sent to Ben Field, Office of Student Affairs, College of Osteopathic Medicine.

***

MILL PLACES FIFTH OF 12,000
IN NATIONAL PHOTOGRAPHY CONTEST

Walter Mill, D.O., chairman of the Department of Osteopathic Medicine, won fifth prize in a field of more than 12,000 competitors in a photography contest sponsored by Diversion magazine.

Mill's photo, entitled "Frontier Days", was shot just as a rider separated from a Brahman bull at a rodeo in Cheyenne, Wyoming.

His prize included a Nikon FE camera, lens and speed flash. His picture will be published in the April issue of Diversion.

***
TUESDAY, MARCH 13, 1979

1:30 p.m.  Dean's seminar: "Experiences in Medical Education -- Physical Medicine and Rehabilitation" by Kurt Jochheim, M.D., director of the Rehabilitation Institute, University of Cologne Medical Center, Cologne, West Germany. A316 E. Fee. Persons interested should contact Sharon Rochen, 355-9611.

WEDNESDAY, March 14, 1979

6:30 p.m.  Urology Series: "Pelvic Exteneration" by E. Michael Lodish, D.O., certified general surgeon and clinical assistant professor of oncology, MSU-COM. Two hours continuing medical education credit requested. Michigan Center for Continuing Education in Osteopathic Medicine, 900 Auburn Rd., Pontiac. Call 313/335-7742.

THURSDAY, MARCH 15, 1979

American Osteopathic Association national board examinations (Part II). Administered at Michigan State University only. For information, contact MSU-COM student affairs, 353-7741.

SATURDAY, MARCH 17, 1979

CANCELLED: Scientific Symposium at Michigan Center for Continuing Education in Osteopathic Medicine.

12 p.m.  Second Annual Pediatrics Conference: by the College of Osteopathic Medicine Department of Pediatrics through March 18. Eleven hours of Category I continuing medical education credit requested. Kellogg Center for Continuing Education. Contact Sandy Kilbourn, coordinator of continuing medical education, 353-8822.

SUNDAY, MARCH 18, 1979

MONDAY, MARCH 5, 1979

12 p.m.  College of Osteopathic Medicine grand rounds: "The Application of Manipulative Therapy in Cardiovascular Disease" by Gary Campbell, D.O., associate professor of family medicine. E101 E. Fee.

11:30 a.m.  Biochemistry seminar: "Pyruvyl Enzymes as Exemplified by Bacterial Histidine" by Esmond E. Snell, Department of Microbiology, University of Texas. 101 Biochemistry.

TUESDAY, MARCH 6, 1979

12:30 p.m.  Microbiology and Public Health seminar: "Fine Specificity and Regulation of T-lymphocytes Using Cytochrome C as Antigenic Probe" by Jacques Chiller, Department of Medicine, National Jewish Hospital, Denver. 146 Giltner.

4 p.m.  Pharmacology and Toxicology seminar: "Latest Concepts in Striatonigral Nigrostriatal Relationships -- or Fate of Striatonigral Nigrostriatal Relations by Dr. Dopamine" by Stephen Kitai, chairman, Department of Anatomy, MSU. B449 Life Sciences.

SUNDAY, MARCH 11, 1979

8 a.m.  Office Gynecology Update seminar (was scheduled for February 11). Michigan Center for Continuing Education in Osteopathic Medicine, 900 Auburn Rd., Pontiac. Preregister by mail or call 313/335-7742.
PONTIAC PROGRAMS FEATURE HEAD AND NECK PAIN, UPDATE OF OBSTETRICS AND GYNECOLOGY

Two March programs at the Michigan Center for Continuing Education in Osteopathic Medicine will feature head and neck pain and an update on obstetrics and gynecology. "Diagnosis and Management of Head and Neck Pain," scheduled for Sunday, March 4, will include an overview, headache and structural relationship, the thoracic outlet syndrome, and cervical disc herniation.

Other topics include the diagnosis, treatment and use of electromyography and nerve conduction studies for cervical radiculomyelopathy.

Faculty for this program include Earl F. Gonyaw, D.O., professor of neurosurgery in MSU's Department of Osteopathic Medicine; Lawrence E. Jacobson, D.O., certified neurologist; Clark J. Okulski, D.O., certified neurologist and associate professor at MSU-COM; Williard Stitzel Jr., D.O., neurological surgeon; and John W. Ziegler, D.O., chairman of the Department of Surgery at Detroit Osteopathic Hospital.

"The Update of Obstetrics and Gynecology" will be held at the Pontiac center on Sunday, March 11.

Topics will include office gynecological procedures, oral contraception, management of menopause; colposcopy and laser therapy, real time ultrasonography, and the normal vaginal delivery.

Seminar staff include Lester Burkow, D.O., Harvey G. Roth, D.O., and John D. Sellers, D.O., all staff at Garden City Hospital, Botsford General Hospital and Osteopathic Hospitals of Detroit; Lester Eisenberg, D.O., medical director and director of medical education at Garden City Hospital; and Ronald S. Paroly, D.O., senior consultant in OB/GYN at Botsford General Hospital.

For each program, approval for six continuing medical education credits has been requested from the American Osteopathic Association and the Michigan Board of Osteopathic Medicine and Surgery.

For registration or further information, contact the Michigan Center for Continuing Education in Osteopathic Medicine, 900 Auburn Rd., Pontiac, Michigan 48057; 313-335-7742.

***

MARCH 17 and 18 PONTIAC PROGRAM RESCHEDULED

The "Scientific Symposium" scheduled for March 17 and 18 at the Michigan Center for Continuing Education in Osteopathic Medicine has been rescheduled. It will be held in conjunction with the American College of Neuropsychiatry seminar April 28 and 29 under the topic "Psychosomatic Medicine."

***
Faculty

James N. Riley, Ph.D., assistant professor of anthropology, presented a paper on "Client Choice Among Osteopaths and Ordinary Physicians in a Michigan Community" at the American Anthropological Association meeting in Los Angeles, and a paper on "Medical Pluralism Revisited: Schools of Medicine as Subcultures" for the Department of Anthropology at the University of North Carolina-Chapel Hill. Riley has also served as a consultant on development of the M.A. program in applied medical anthropology at Memphis State University.

Don Tavano, Ph.D., associate professor, and George Gross, D.O., professor of community health science, are serving as members of the Ingham County Board of Health.

A. L. Rogers, Ph.D., associate professor of botany and of microbiology and public health, presented a seminar on clinical management and laboratory diagnosis of opportunistic fungal infections for the Texas Society for Clinical Microbiology. He also presented a one-day workshop on "Identification of Saprophytic Fungi Commonly Encountered in a Clinical Environment" at the University of Texas in Arlington. The program is a traveling workshop for the American Society for Microbiology.

Fred L. Mitchell, Jr., D.O., professor of biomechanics, was the guest editor of the January 1979 issue of Osteopathic Annals. The publication was devoted to articles on somatic dysfunction.

Gaston E. Blom, M.D., professor of psychiatry and elementary and special education, presented a seminar on "Key Health and Safety Issues and Problems Facing Michigan's Children" at the Michigan kickoff of the International Year of the Child. In addition, he was appointed medical coordinator of special education and rehabilitation programs for the University Center for International Rehabilitation, and has been named a staff member of MSU Program Cork. The program, funded by the Kroc Foundation, is to develop and implement an integrated alcohol curriculum for elementary teachers.

Steven D. Aust, Ph.D., professor of biochemistry, has been appointed by Governor William G. Milliken to the newly created State Toxic Substance Control Commission. If confirmed by the Senate, Aust will serve a two-year term on the panel, which is to draft a toxic emergency declaration, investigate reports of problems with toxic substances, and to examine appropriate state programs for recommendations.

E. James Potchen, M.D., chairman of the Department of Radiology, spoke to the School of Public Health at the University of Michigan in January. The title of his presentation was "Assessing the Value of Diagnostic Procedures: Technical and Social Considerations."

Tom Harle, M.D., professor of radiology, spoke on peripheral fractures at the University of Texas Health Science Center's course on "Radiology of the Acutely Ill and Injured Patient" January 26-27.

Gary Campbell, D.O., associate professor of family medicine, was a panelist in a discussion on family planning for the "Ask the Doctor" program on WKAR-TV February 15. This winter and spring the programs will be directed to the International Year of the Child.
Brigitte Jordan, Ph.D., assistant professor of anthropology and community health science, presented "The Reality of Childbirth: A Social and Biological View" at York University, Toronto. She also spoke to the Obstetrics and Gynecology Residency Department at Sparrow Hospital on "Birthing Methods of Other Cultures."

Joseph Waleczak, D.O., associate professor of osteopathic medicine, has been named a diplomate by the American College of Osteopathic Obstetricians and Gynecologists at their February meeting in San Antonio, Texas.

***

Clinical Faculty

Gary L. Slick, D.O., assistant clinical professor of osteopathic medicine from Detroit, has been named a member of the American Osteopathic Board of Internal Medicine. He is also the author (with K. Ketler, D. Ploth, and G. DiBona) of "Effect of Hypermagnesemia on the Urinary Concentrating Mechanism in the Rat and Dog" published in Nephron 22:20-28, 1978.

Elliot K. Wicks, Ph.D., adjunct assistant professor, was one of the speakers at the 1978 Western Health Care Cost Containment Conference in San Francisco. The conference was for corporation officials in the western states who are responsible for administering the fringe benefit plans for their companies. Wicks spoke on "Multiorganizational Approaches to Cost Containment: The Michigan Coalition," a discussion of the successful effort of a coalition of "big three" auto companies, the United Auto Workers, Blue Cross and Blue Shield, and Michigan state government to pass legislation to establish a mechanism for reducing the supply of excess beds in the area.

H. Vard Nelson, D.O., clinical professor of ophthalmology in the Department of Osteopathic Medicine, has been elected chief of the medical staff of Flint Osteopathic Hospital.

E. Michael Lodish, D.O., clinical assistant professor of osteopathic medicine, was guest editor of the January 1979 issue of the Michigan Osteopathic Journal, which was devoted to oncology. Lodish is from Highland Park.

***

Alumni

Frederick Schaller, D.O., 1977 alumnus, has joined the Dan Flood Medical Center in White Haven, Pennsylvania. He completed his internship at Pontiac Osteopathic Hospital, and is residing in Lake Harmony Estates.
COUNCIL OF MEDICAL STUDENTS ESTABLISHED

Students in MSU's three medical schools will have their own representative government as the new Council of Medical Students is established as a functioning university organization.

Developed to meet the specialized needs of professional students in the College of Osteopathic Medicine, College of Human Medicine and College of Veterinary Medicine, the Council is expected to provide a forum in which students may voice their opinions and develop funds to use for projects and activities.

Though a constitution was approved last winter, planning for the organization has been in process for three years.

According to David Neff, a third-year MSU-COM student, goals of the Council include a centralized medical library, promotion of a medical student handbook, and a solution to students' parking problems. Other activities will include vocational fairs, funding for student representatives to professional conventions, and improved communications channels among the medical students.

A 50-cent tax will be paid by medical students to the Council, although these students also will continue to be part of the Council of Graduate Students.

***

MSU BOARD OF TRUSTEES MEETING SCHEDULE

Regularly scheduled meetings of the MSU Board of Trustees for 1979 include:

| March 22-23 | July 26-27 |
| April 26-27 | September 27-28 |
| May 24-25 | October 25-26 |
| June 21-22 | December 6-7 |
