

Study Buddies

Michigan State University College of Osteopathic Medicine

What is Study Buddies?

Study Buddies is a student-run group dedicated to peer-to-peer learning in a small group format. Study Buddies conducts reviews for all first and second year course-work in a small-group setting. Group discussions focus on reviewing major concepts and practice questions. Study Buddies works closely with Dr. Bice to organize tutors for both first and second year courses. The largest tutoring effort is the work that goes into Summer Anatomy, including the practice practical and individual tutoring. We also offer individual tutoring through a program called "Study Partners."

ANGEL webpage:

Study Buddies is accessible via the web! On your ANGEL homepage, go to the tab marked "Study Buddies". There, you can find information for almost all of your classes. You can also upload your own submissions, to share with all of your classmates.

How to get involved?

Study Buddies is open to all students. Events are emailed to the entire class, and anyone is welcome to attend. This organization is unique in that it has two E-boards concurrently, one for 1st year and one for 2nd year. The E-board for class of 2013 will be chosen during mid-August. If you are interested please email one of the current E-board members!
