

Fall (Semester 5) Orientation

William M. Falls, Ph.D.
Associate Dean/Student Services

“We Connect with Students”

Semester 5 (Fall) Curriculum

Elizabeth Petsche, J.D.

Director of Preclerkship Curriculum

Semester 5 Courses

Course ID	Credits	Title	Coordinator/s
OMM 514	1	Osteopathic Manipulative Medicine 4	Gugel
OST 554	3	Osteopathic Patient Care 4	Scott
OST 569	1	Young and Aging Adult 4	Rosenberg/Komara
OST 577	2	Psychopathology System	Smith/Ley
OST 578	2	Hematopoietic System	Gulick
OST 579	9	Cardiology System	Hughes/Strobl
FCM 650*	1	Principles of Family Medicine (Preceptor)*	Keenum

A couple of Key Points

- Computer Based Testing Policy Changes
- Note Cardiology Policy: No make-up exams, regardless of reason, for the first 3 exams

A couple of Key Points

Computer Based Testing Policy Changes

If an excused absence is not granted, the student will be permitted to take a make-up examination (if available, see course syllabus) but with a penalty as defined below. If more than one course has items on the examination, the penalty will be applied to the score for each course.

- i) On the first unexcused absence, there will be a 10% deduction in the score(s).
- ii. On the second unexcused absence, there will be a 20% deduction in the score(s), and a face-to-face meeting with a College administrator will be required.
- iii) On the third unexcused absence, there will be a 20% deduction in the score(s), a face-to-face meeting with a College administrator will be required, and a letter of unprofessional conduct will be placed in the student's academic file.
- iv) Any further unexcused absences from an examination will be addressed as in item 6.d.iii; additional actions may be taken on a case-by-case basis.
- e. These unexcused absences are cumulative and will be tracked longitudinally across the curriculum, beginning with a student's first day of matriculation.

Office of Student Services

Offices of the:

- Associate Dean
- College Registrar
- Academic/Career Guidance
- Personal Counseling/Health Promotion
- Scheduling and Student Activities

“We Connect with Students”

The Office of Student Services listened to your feedback!

- We will endeavor to do our part to help you connect the dots between curriculum, administrative deadlines, and mandatory and extracurricular events/activities.
- We will also help you plan ahead and so that you can take part in some of events/activities that are available to you.

Semester 5 Timeline/Overview

- Connecting the Dots
 - Course Overview
 - Mandatory College Events
 - Deadlines
 - COMLEX Level 1 Registration
 - Class/Student Government Meetings
 - Student/Administration Hours
 - Personal Counseling/Health Promotion Events
 - Extracurricular Student/College Events
 - Academic/Career Guidance Workshops
 - Holiday's

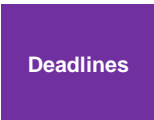

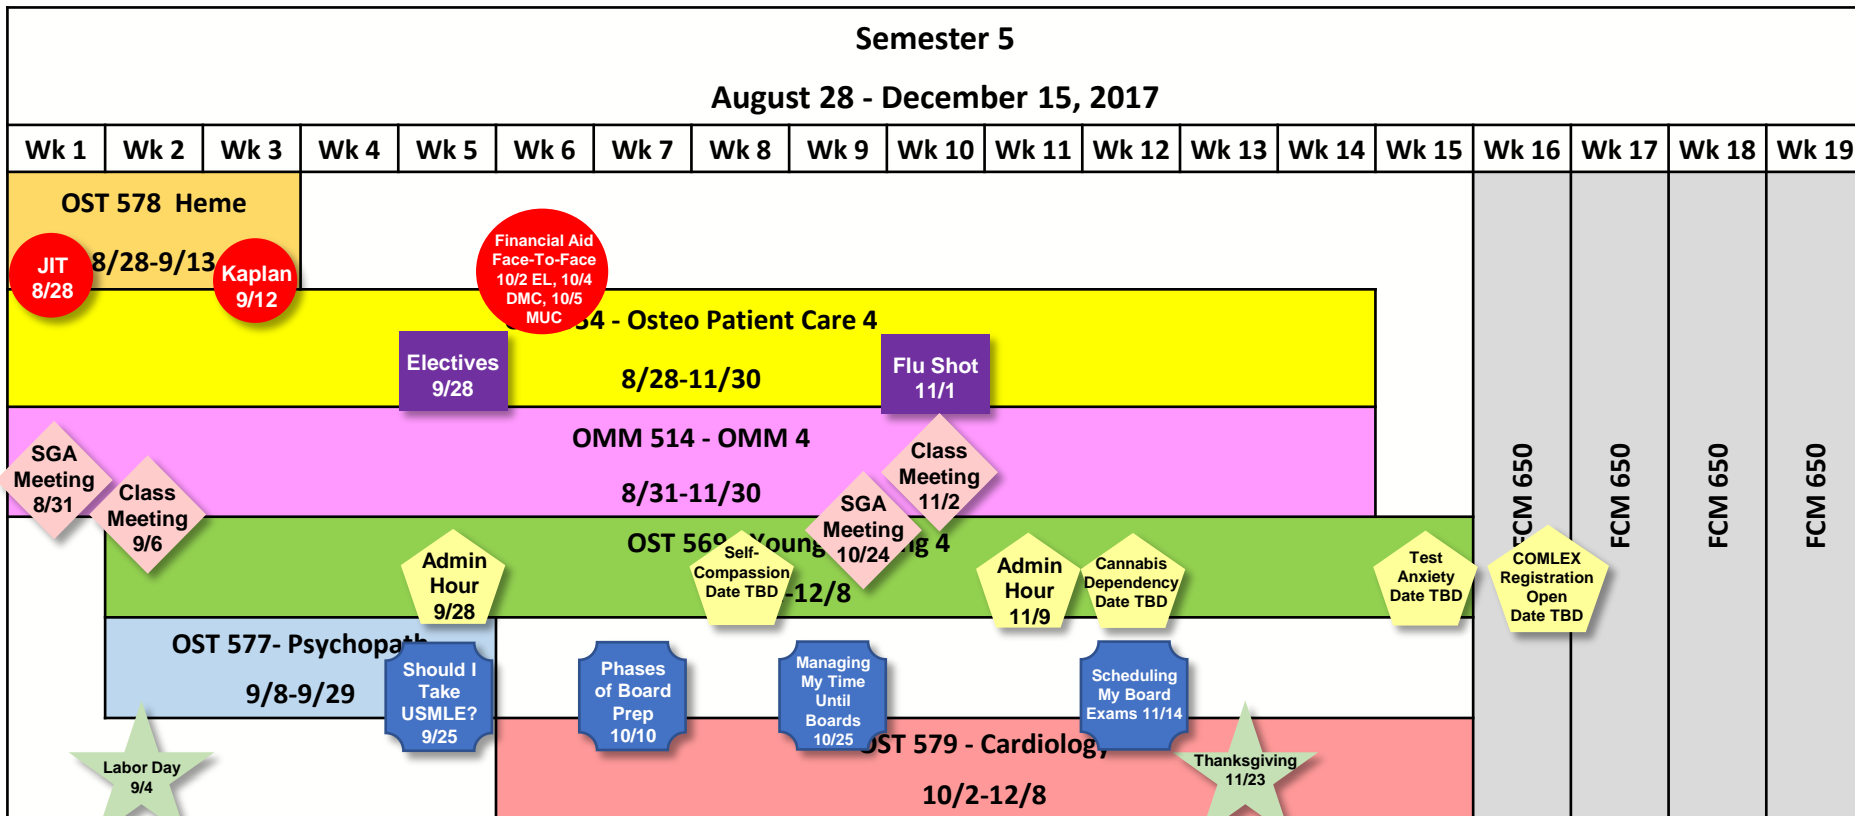

Overall Glance at Semester 5

Semester 5																		
August 28 - December 15, 2017																		
8/28	9/4	9/11	9/18	9/25	10/2	10/9	10/16	10/23	10/30	11/6	11/13	11/20	11/27	12/4	12/11	12/18	12/25	1/1
OST 578 Heme 8/28-9/13																		
OST 554 - Osteo Patient Care 4 8/28-11/30																		
OMM 514 - OMM 4 8/31-11/30																		
	OST 569 - Young & Aging 4 9/11-12/8														FCM 650	FCM 650	FCM 650	FCM 650
	OST 577- Psychopath 9/8-9/29																	
	OST 579 - Cardiology 10/2-12/8																	

Connecting the Dots

Items to be Working on Behind the Scenes....

- What we will do:
 - MSPE (Dean's Letter) – Associate Dean
 - New MSU E-Mail – “Office 365”
 - Provide your face-to-face financial aid meetings at each site as required for COCA accreditation – Financial Aid staff
- What you will do to assist us:
 - Curriculum Vitae (CV) - Template location and guide :
“Students webpage” - “Academic and Career Guidance” – “CV or Personal Statement Guide”
 - KNOW your Professional Responsibilities & ACT accordingly!
😊

Information from the Office of Academic/Career Guidance

Dawn Dewar, M.Ed

Academic and Career Advisor

Preparing for Board Exams, Part 1: The Big Picture

Board exams in a nutshell

- DOs must take COMLEX
 - Comprehensive Osteopathic Medical Licensing Examination
 - 3 Levels
- MDs must take USMLE
 - United States Medical Licensing Examination
 - 3 Steps
 - Optional for DO students
 - Required for Canadian students who wish to practice in Canada

Board exams in a nutshell

- 1° purpose
 - **Protect the public** from incompetence!
 - A passing score of 400 represents a minimal acceptable level of competence
- 2° purposes
 - Graduation & Licensure
 - Passing COMLEX Level 1, Level 2CE & Level 2PE required for graduation
 - COMLEX Level 3 taken after graduation
 - **Passing all 3 required to be licensed**
 - Screening residency candidates
 - Major role in determining competitiveness

COMLEX Level 1: the basic basics...

- Taken at the end of 2nd year (June-July)
- Emphasis: *Scientific Understanding of Health and Disease Mechanisms*
- Covers biomedical science content learned in Preclerkship
 - This is why course performance is best predictor of board performance

This is a Marathon, not a Sprint Pace Yourself!

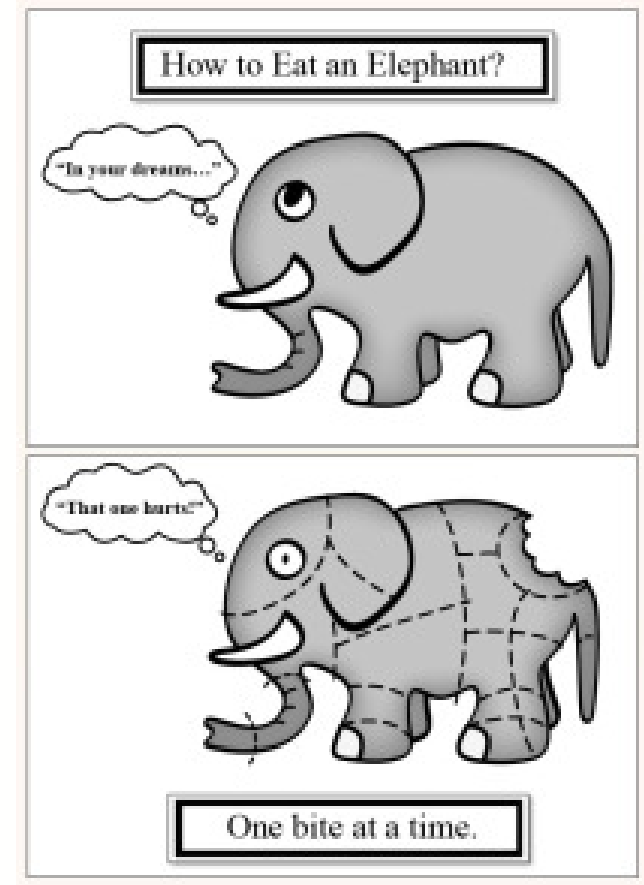

When should you start?

- Don't ask when, ask, "What should I be doing **now**?"

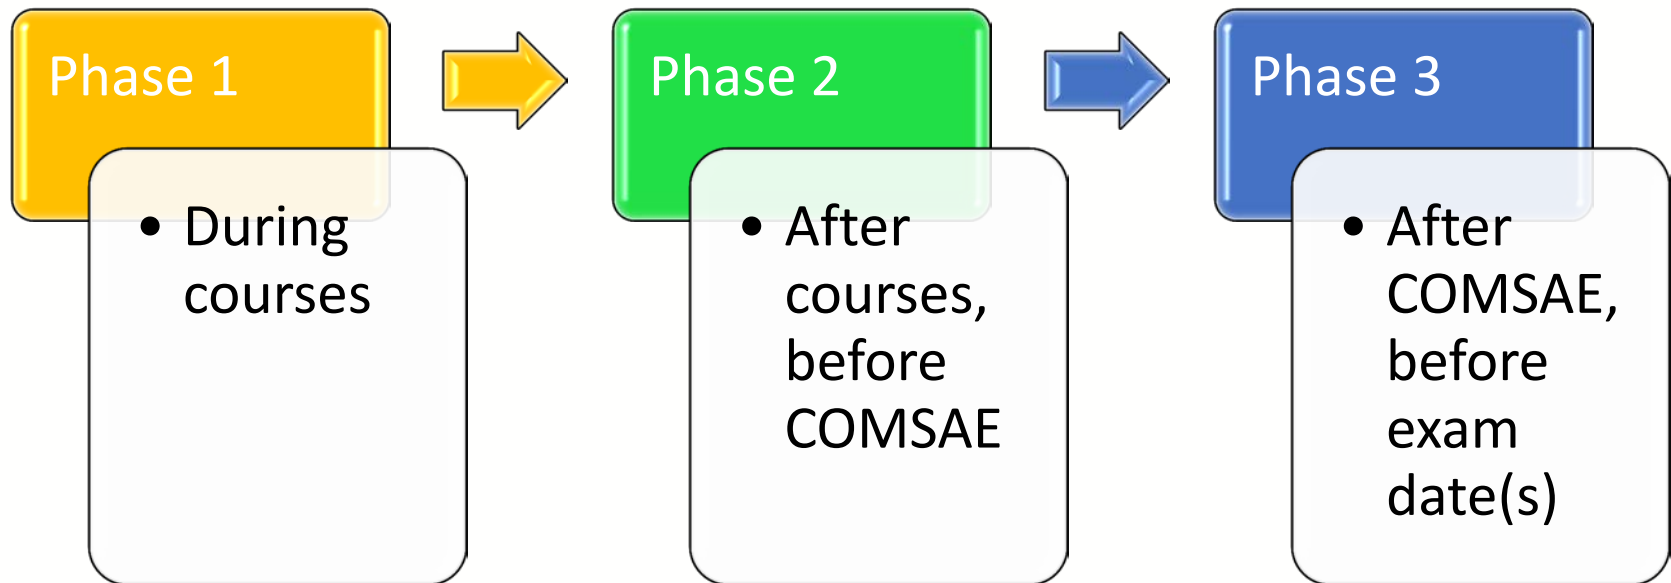

Divide board prep
into
manageable
pieces

Phases of Board Prep

PHASE 1	PHASE 2	PHASE 3
Acquire knowledge base & develop skills (e.g., deep learning strategies)	Review knowledge base & practice skills (e.g., application of knowledge)	Refine knowledge base & hone skills (e.g., clinical reasoning, stamina)
Focus: Coursework (maintain exam average > 85%)	Focus: Prep for mandatory COMSAE	Focus: Intensive review: 4-8 weeks “The Final Push”
Select board prep resources & develop initial draft of board prep plan	ID & fill major knowledge gaps using Kaplan simulated exam & High-Yield Review Course or other resources	Complete practice Qs to ID common thinking errors & fill remaining knowledge gaps
Supplement coursework with board prep resources (possible exception: Respiratory course)	Complete **20-50 COMPLEX-style Qs/day** ; review explanations	Complete **50-100 Qs/day** ; review explanations for incorrect answers & correct guesses
Complete 5-20 board-style Qs/week to gain familiarity with question style	At least 2x/week, complete 2-3 back-to-back blocks of 50 Qs (100-150 total) using timed format and mixed questions (all subjects)	At least 1x/week, complete 3-6 back-to-back blocks of 50 Qs (150--300 total) using timed format and mixed questions (all subjects)
Self-reflect/-assess to ID & mitigate barriers, e.g., ineffective or inefficient learning strategies, low reading comprehension, anxiety, procrastination, etc.	**If also taking USMLE, avoid USMLE-style Qs during Phase 2 to increase likelihood of achieving 450 cut score on COMSAE	**If also taking USMLE, make sure to complete <u>both</u> USMLE-style (e.g., Uworld) and COMPLEX-style (e.g., COMBANK) Qs during Phase 3

Upcoming Workshops

- Should I take the USMLE?
- Scheduling My Board Exams
- Managing My Time Until Boards
- Phases of Board Prep: What should I be doing now?
