LGBTBA in Medicine is a dedicated advocate for equality and acknowledging diversity in our community. As medical students, we strive to educate ourselves and our colleagues about LGBTBA issues as they relate to medicine and everyday life through community and campus resources, speakers, and health clinics. Our goal is to create open-minded, competent physicians willing to serve a larger population.

We host and participate in many events, including Motor City Pride Health Screenings, LGBT cultural competency events, speakers, physician networking and community service.

LGBT and CIM members perform health screenings at Motor City Pride 2011.
